

Documentation Math Riddles Templates

How the game works:

This it's a math riddle game with currently 20 questions, it's possible to modify that ones or add more questions.

This game can be published on the stores and be monetized?

Yes

It's necessary to change the colors and personalize the game before publishing?

Its recommended, since that may have others like this published. Otherwise it's not necessary.

How the code works?

The code is very simple and easy to understand, check the comments in the code. If you have any difficulties contact me.

How do add new questions?

Inside UnityEditor, in the projects tab, check the folder "Riddles", they are scriptable objects with the questions, to create one, select one of them and press Ctrl D, after it's create modify as you want.

Next step, in the Hierarchy tab, open LevelMenuCanvas, in the scrollview, content there is all the levels, use Ctrl D to create a new one, and configure the inspector like you see in the others.

What if I need support?

Send an email to: heisenberglopes@gmail.com and I'll respond asap.
